Rishi Kottala

Java Full Stack Developer | Core Java, Spring Boot, React.js
Nizamabad, Telangana, India

Summary

About

I'm a passionate and motivated Java Full Stack Developer skilled in Core Java, Spring Boot, Hibernate, RESTful APIs, and React.js. I love building responsive, user-friendly web applications and enjoy solving real-world problems through clean, maintainable code.

I have hands-on experience through multiple projects — including a Student Information System, Flight Management System, and a Hotel Management System — demonstrating my ability to design and develop complete end-to-end solutions.

I'm looking for opportunities to grow as a Full Stack Developer, work with modern technologies, and contribute to innovative, scalable products.

Technical Skills: Java | Spring Boot | React.js | Hibernate | REST APIs | MySQL | Git | VS Code

Let's connect!

Experience

AaoStays

Full Stack / backend intern

November 2025 - Present (5 months)

India

- Working on a full-stack web application using React.js and Spring Boot.
- Fixing bugs, improving API integration, and handling frontend-backend issues including CORS.
- Gaining hands-on experience in database management, debugging, and real-world development practices.
- Learning from industry professionals while contributing to the growth of a fast-growing hospitality platform.

QSpiders - Software Testing Training Institute
Academic project
July 2024 - April 2025 (10 months)
Hyderabad

Title: Student Information Management System

Position: Java Developer (Academic Project)

Duration: Jan 2024 – Apr 2024

Description:

- Built a robust student management system using Java and SQL with full CRUD operations.
- Designed modules for registration, tracking, and reports using OOP principles.
- Ensured secure transactions with validation and error handling.

Title: Flight Management System

Position: Full Stack Developer (Academic Project)

Duration: May 2024 – Jul 2024

Description:

- Developed booking, scheduling, and cancellation modules with Java, Spring Boot, Hibernate.
- Integrated REST APIs and used MVC architecture for clean code structure.
- Tested endpoints using Postman.

Title: Hotel Management System

Position: Full Stack Developer (Academic Project)

Duration: May 2025 – Jul 2025

Description:

- Created a full-stack hotel management application using Spring Boot and React.js.
- Built RESTful APIs for booking, check-in/out, and admin controls with secure MySQL integration.
- Designed responsive UI with React and Axios for real-time updates
